

**STRIVE TO  
ACHIEVE**

**EXCELLENCE  
ACADEMY  
FOR LEADERSHIP**

The Excellence Academy for Leadership (*Excellence Academy*) is a joint venture between Executive Excellence Pty Ltd, Teamcraft Pty Ltd and Epic Private Journeys Pty Ltd. We offer open development programs for individuals and small groups from a variety of businesses.

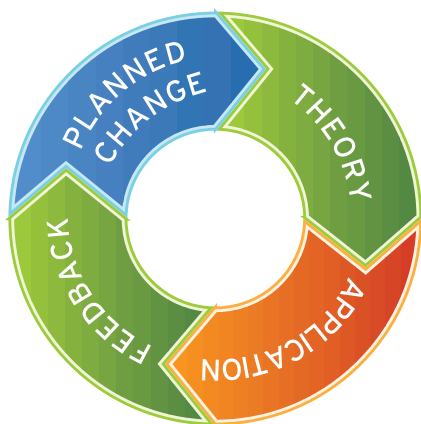

Alternatively, we schedule private programs specifically for your organisation. The Excellence Academy aims to provide high quality, easily accessible developmental courses, plus affordable consultancy to businesses, associations and individuals.

Operating from excellent adventure learning locations across the country and with our network of best of breed providers around the world the Excellence Academy has become the provider of choice for many major corporations who share the common goal of establishing an ethic of sustained profitability built on a platform of sound and effective people leadership.

The Excellence Academy has built its reputation as a benchmark provider upon three principles:

**AFFORDABILITY:** We have systematically removed the often prohibitive add-on-costs and training overheads from our delivery process, while maintaining an exceptional standard of logistic support and quality of program experience. As a result, our clients receive the best cost-to-benefit ratio available in the market.

**CHANGE:** There are many excellent courses available that will take participants through an exploration of modern leadership theory. At The Excellence Academy however, we believe there is a difference between learning “about” leadership and working to becoming a better leader. Our programs work through our Experiential Learning Cycle:-

**THEORY**  
Concepts & Ideas

**APPLICATION**  
Test & Adjust

**FEEDBACK**  
Review & Explore

**PLANNED CHANGE**  
Continuance & Application

**SUPPORT:** The majority of leadership development programs are complete when participants depart the learning venue. Some send people back to the workplace with the added burden of a work place “project” to complete at the time when all their energies are needed to resist the renormalizing pressures they will always experience. Our programs provide on going support to all participants during this vital post-course stabilisation phase.
